Index to Titles of Union List of Serials - 1975

National Oceanic & Atmospheric Admin.

Prepared For
Environmental Protection Agency

1975

KEEP UP TO DATE

Between the time you ordered this report—which is only one of the hundreds of thousands in the NTIS information collection available to you—and the time you are reading this message, several *new* reports relevant to your interests probably have entered the collection.

Subscribe to the **Weekly Government Abstracts** series that will bring you summaries of new reports *as soon as they are received by NTIS* from the originators of the research. The WGA's are an NTIS weekly newsletter service covering the most recent research findings in 25 areas of industrial, technological, and sociological interest—invaluable information for executives and professionals who must keep up to date.

The executive and professional information service provided by NTIS in the **Weekly Government Abstracts** newsletters will give you thorough and comprehensive coverage of government-conducted or sponsored research activities. And you'll get this important information within two weeks of the time it's released by originating agencies.

WGA newsletters are computer produced and electronically photocomposed to slash the time gap between the release of a report and its availability. You can learn about technical innovations immediately—and use them in the most meaningful and productive ways possible for your organization. Please request NTIS-PR-205/PCW for more information.

The weekly newsletter series will keep you current. But *learn what you have missed in the past* by ordering a computer **NTISearch** of all the research reports in your area of interest, dating as far back as 1964, if you wish. Please request NTIS-PR-186/PCN for more information.

Keep Up To Date With SRIM

SRIM (Selected Research in Microfiche) provides you with regular, automatic distribution of the complete texts of NTIS research reports *only* in the subject areas you select. SRIM covers almost all Government research reports by subject area and/or the originating Federal or local government agency. You may subscribe by any category or subcategory of our WGA **(Weekly Government Abstracts)** or **Government Reports Announcements and Index** categories, or to the reports issued by a particular agency such as the Department of Defense, Federal Energy Administration, or Environmental Protection Agency. Other options that will give you greater selectivity are available on request.

The cost of SRIM service is only 45¢ domestic (60¢ foreign) for each complete microfiched report. Your SRIM service begins as soon as your order is received and processed and you will receive biweekly shipments thereafter. If you wish, your service will be backdated to furnish you microfiche of reports issued earlier.

Because of contractual arrangements with several Special Technology Groups, not all NTIS reports are distributed in the SRIM program. You will receive a notice in your microfiche shipments identifying the exceptionally priced reports not available through SRIM.

A deposit account with NTIS is required before this service can be initiated. If you have specific questions concerning this service, please call (703) 451-1558, or write NTIS, attention SRIM Product Manager.

INTRODUCTION

This is an index to serial holdings in a joint listing of the U.S. Environmental Protection Agency (EPA) (including the Illinois Institute for Environmental Quality), the National Oceanic and Atmospheric Administration (NOAA), and the U.S. Patent and Trademark Office. The index consists of significant words from each of 11,715 serial titles. This index serves as an entry point to the companion publication, Union List of Serials 1975. It should be useful to identify a title when one knows only a few significant words in the title. It should also be useful to identify several titles in a given subject area. Caution should be exercised when using the subject approach since serials might cover many more subject areas than described in the title. Also abbreviations, acronyms, synonyms, and other related terms should be used to obtain more thorough coverage. A list of the abbreviations used is included.

Questions and comments regarding this document may be referred to:

ABBREVIATIONS USED IN THE SERIAL TITLES

Those abbreviations marked with an asterisk indicate that the word will be spelled out in full, rather than abbreviated, if it is the first word of the serial title.

FORMAT AND USE OF THE INDEX

This index is in a keyword-out-of-context (KWOC) format. The entries on the left side of each page are significant words (keywords) from each serial title. Conjunctions, articles, prepositions, and other terms have been excluded that would not be of assistance to the user in locating titles. All titles which contain a given keyword are listed under the specific keyword. Only the first 99 characters (including spaces) of a title are given. The asterisk following each title was computer generated and will not be of significance in your use of this index.
